ABOUT US

WHITE BLACK LEGAL is an open access, peer-reviewed and refereed journal providededicated to express views on topical legal issues, thereby generating a cross current of ideas on emerging matters. This platform shall also ignite the initiative and desire of young law students to contribute in the field of law. The erudite response of legal luminaries shall be solicited to enable readers to explore challenges that lie before law makers, lawyers and the society at large, in the event of the ever changing social, economic and technological scenario.

With this thought, we hereby present to you

THE INCREASING PROBLEM OF DRUG ADDICTION AMONG YOUTH IN THE SOCIETY – AN ANALYSIS

AUTHORED BY - RADHA

Research Scholar, Shri Venkateswara University, Utter Pradesh (India)

AUTHORED BY - DR. RAJ VARDHAN

Professor, School of Law, Shri Venkateswara University, Utter Pradesh (India)

Abstract

The increasing problem of drug addiction in the society and among the youth has become a matter of great concern. Due to the habit of drug abuse among the youth these days, we are seeing and hearing things like discord in the family, fights, theft, robbery, murder, assault and rape. Due to which one has to see and bear the anger and hatred of the family members, taunts etc. So that people in the family and society can be considered a form of violence which is a direct result of alcohol and drugs. There are young people who become victims of violence by using drugs and alcohol. The consumption of drugs in the family spoils the condition of our society and family. Due to which the family members have to face various difficulties. Due to which the family members have to face various difficulties. And the reason for some people becoming violent is the suffocation of family discord, loneliness, failure in life due to unemployment, which has to be seen and endured with hardships. Because of that they become filled with anger. Due to which he becomes violent. And those youth and teenagers start getting attracted towards drugs. And he starts considering drugs as his companions. Due to which he takes away all his problems and enjoys the joy of drugs. And due to its influence they forget their problems, pain and worries. And in this way he enjoys the pleasure of drugs.

Keyword: Increasing problem of drug abuse among youth, family discord, loneliness, unemployment, failure in life.

1. Introduction

The use of alcohol and drugs has increased so much in the society. That every youth is in its grip. And the families and people around us who are victims of drug addiction are increasing in the society and our young generation is wasting its future by coming under the influence of this drug addiction. Due to which the occurrence of this problem has become a matter of great concern. The youth who, due to bad company and bad habits, have to see and endure family discord, financial crisis, social hatred and resentment etc. In some youth, drug abuse is the easiest way to create a feeling of laziness in a person full of debauchery. Intoxication: If a person gets addicted to drugs. So he becomes victim of many types of diseases. Due to which he loses his identity in the society due to being addicted to drugs. And he is not in a position to think about his good and bad. Due to which he has to become a victim of social hatred. People start shying away from sitting with him and people of the society start looking at him with respect. Which once damaged cannot be rebuilt. Similarly, people from affluent families start consuming drugs to enjoy youth in every way. And gradually they become addicted to them. Some people start consuming them out of curiosity to support themselves. And later they get used to them. And in the present era of modernity, a section of the youth sees it as fashion.

It is considered a symbol of luxury and fashion. And in the trend of drug addiction, drug addiction is being seen very much in places like villages, cities, towns etc. Today, the effect of drugs has been seen in everyone from workers to politicians to students to families. Which has been considered as the basis for comparison of drugs on similar experiences. So that parents do not have time to sit and talk with their children. And due to this stress, the youth fall into bad company. And some youth are also like this. Those who drink alcohol regularly in centers like colleges, hotels and businesses, a form of drug fashion can be seen in any functions and parties. Gay has become mandatory for that fashion. Who come together like the experts of any reaction and provide timely information about the side effects and harms arising from the consumption of intoxicants. They are not able to get it due to lack of which they themselves become victims of neglected drugs and gradually they become addicted to it. Similarly, sometimes the habit of going to clubs also helps in staying intoxicated. Once it gets into a person, it becomes very difficult to get rid of it. Even today in Hindu society people consume drugs on occasions like Holi, Dussehra etc. And once they come into effect, they start consuming them from time to time. And in the end they become addicted to them. And they indulge in crime, gambling, misconduct etc. Consumption of alcohol or other drugs is common for such people. So that a person does not need

any ceremony to consume alcohol. Nor any festival if he gets used to it. So it starts being consumed in sufficient quantity.

No matter what position or prestige category they hold. Due to which, there are problems in the family like economic, social, activities, tendency to take drugs, strong desire to take drugs despite any grounds among various options, dispersion of drugs in all its forms and forms of activities among the common grounds. Among the formulations, there are various mentions of any reaction which is considered to be the basis form of any power which is expressed due to more or less of any net reaction which makes the same formulation before any of the similar terms. The entry and format of any record has been treated as a uniform provision for all those activities which provide any wide range of forms to the official among similar records of any experiences and which does not allow any alternative between different formats and bases. The basis of any case is on any basis activities are placed on different aspects depending on the different aspects like forms which depend on any alternative response among the different basis which any case takes on different forms in different countries.

The uniformity and constitutionality of the system is considered to be the form that expresses any scientific response between different forms of the same records as clearly as any alternative forms that are considered to be the form of any similar records, which is considered to be the form of different aspects and powers. On the basis of this, the reaction to addiction is considered to be a disease, a habit, which is expressed through any motives and tendencies. The basis form of the reaction of the same makes clear the forms in front of all those activities which are similar to any basis. Also makes clear on all entries with contracts that it is not possible with any response that is not identical between identical records, that is, any similarity and any choice between different formatting with respect to records. controls based on entries Alcohol abuse is a separate issue involving impact on the society.

People belonging to different age groups and different walks of life in every society are victims of drug abuse. The environment around the person can also lead to drug addiction where drug taking is acceptable. And people take drugs and there the symptoms of drug addiction can soon develop in the children also. Seeing the drug addicts present in the houses, they become bigger. Children themselves also become addicted to it. The speed at which the bright boys and girls of schools and colleges are adopting it by living just a step away from their educational institutions makes one understand that the situation is very worrying and as a result, fighting like rape should

be reduced in the society. Incidents happen every day. Being a sociologist, we have to find solutions to these problems due to which drug addiction has become a terrible disease in our country, which has given rise to drug trafficking, murder and other crimes among the youth of the society in the metropolitan cities. Due to unemployment and disappointment of success, they often start consuming drugs. A problem has been revealed that in the last two decades in India, there has been an unlimited increase in the tendency of suicide and drug abuse among the youth due to lack of job or success in examinations.

However, in increasing this trend, the producers of many types of synthetic substances have also promoted the addiction of stimulant drugs, which leads to failure in work, disappointment, mental stress, easy sorrow and the troubles of life and do not consume drugs even after recovering from the problems of today's youth. Does Which has a bad effect of this addiction on the people of the society and the people around. The people of the society and the family members are very concerned about the future of the children and they think that it should not affect our children so that they do not spoil their future by coming in his company. Can't do anything bad his mental condition is so bad that he is not able to think he doesn't understand what is good for me what is bad I just know that if I have to do drugs then I have to do it and more than that Does not know whether for that also he can go into the category of any crime and he can go to any extent to get intoxicated. This behavior comes under the category of a crime for which the people of the society start fearing him and he does not know that people have started avoiding him and looking at him with hatred, his body does not reduce after getting intoxicated. And he keeps falling here and there, so that he becomes a subject of jokes and people make fun of him, but he still does not stop drinking. What a useless person he is who abuses his family members and people around him so that he becomes sad even the people of the society who live with him remain sad and he spoils the mental condition of those people. Gives and spoils the condition of the house, even the children of that house start hating him.

He always threatens others that I will kill myself, that I will kill others, which makes his family members live in fear and he does not know what will be the result. An intoxicated person becomes like a violent criminal and after getting intoxicated neither his sister nor daughter is visible. He becomes so intoxicated that he crosses his limits. Rapes even and it comes down to molestation which has a bad effect on the daughters-in-law of our society and spoils their future and the drunken person uses obscene words with the girls going on the road. Due to which there is a bad effect on the women and girls of today's youth after consuming drugs, their mental balance

deteriorates so much that they resort to rape and to such an extent that they convert into the category of crime. They can't even imagine what we have done in the state of intoxication and what we have messed with ourselves. After getting intoxicated, a person becomes so violent that he becomes a criminal not only of his own people but also of his children. They do not know their good and bad, they think that what I am doing, what I am not doing, in order to get intoxicated, they start stealing and robbing, and they find a means of getting intoxicated with that money, from which they get good experience and He makes anyone his victim to get intoxicated so that he can get intoxicated and he remains beyond the state of good and bad so that he is lost in himself and he is drunk here and there.

People think not only to him but to his future generation that such a drunk person is spoiling his future and his personality and character both get spoiled. Rich people have made the mistake of understanding that they rob people of their wealth by threatening them and make them intoxicated, they consume drugs even after selling household items. He threatens to kill her if she doesn't listen to him. And keep creating a situation of strife in the family so that the family members remain afraid of him and he maintains a state of fear in the minds of the people so that people fear him and if they do not scare him. So he even abuses them, even to get intoxicated, he sells household items quietly, and by selling them to his wife's pocket, he does intoxicants, after that he becomes addicted to drugs with the person, which leads to fights and quarrels in the house. remains and threatens to kill his wife and his family members to commit suicide so that people do not say anything by instilling fear in the minds of the people; He abuses the policemen and if the policemen catch him then put him behind the bars and after coming from there he becomes more dreaded by the people and they are even more violent with the people. becomes so strong that the people around are more afraid of him and he becomes so strong after getting intoxicated that he does not see whether we are on the road or at home, he falls asleep after drinking and his Along with this, such an incident happens that his family members and people around him are surprised, due to which the environment around him always becomes frightening, due to which his family members are always in fear that he will take any such step in the state of intoxication. Do not pick it up so that his life gets spoiled and the future of his family members gets spoiled. A drug addict is neither a companion nor a friend of anyone; however, he is a criminal who can reach any state of mind.

Drunk person remains a victim of insomnia, he does not see anything in the greed of intoxication, he does not see his family, nor his children, he sees only one thing, even his wife and child to get

drunk. pledges which is a shameful thing for him and a shameful thing for the society, he does not know how fatal the consequences will be after this In earlier times, drugs could only be used by the middle-aged and old. In the past, young children were not allowed to use them, although they were given to children as a medicine whenever they had a cold. It was a tradition to make the newborn sleep by mixing opium mixed with ghutti, by doing this it helped in keeping the babies healthy. So that they used to fall asleep easily after consuming drugs, but today's young people have made drugs a fashion, not only as medicine but also as fashion and have started using it. Some people have also started using drugs to reduce their stress, due to which people have to face unrest and mental problems. Due to which people have forgotten to sit together, talk etc. The reason is also that people have to stay alone so that people do not see them, but do not raise any finger on their character, they consume drugs secretly and nowadays people have started doing it openly. They also find a means to make fun of people by which they become a laughing stock among the people. People see them falling here and there and make fun of them. They drop it somewhere themselves or get it stolen and then come home and say that someone has stolen or snatched that money and they fight and fight with them in a drunken state and get into a fight. For the future, it becomes a matter of great concern for the society and the country that intoxication makes a person like a criminal. So that the fatigue that is causing them fatigue can be reduced so that a new energy remains in the body.

2. Meaning of Research

Our society is built in such a way that from the victims of drug addiction to all the people around us, the future of our young generation is getting ruined by coming under the influence of this drug addiction, due to which the society is sleeping about the future of this generation. Every citizen has to be made aware in different ways which any research has been expressed on the basis of different formatting which can be made aware to everyone of the society so that our society can help the country and the people living in it to get rid of this toxic substance. The youth can meet, whether they are boys or girls. This association and environment also has an impact on the fact that the young men and women who go to the metropolis for the purpose of studies but due to bad company, end up consuming drugs to increase their sexual arousal. Efforts are made to increase drug addiction and the changes in the lifestyle in the present times have helped in promoting sexual crimes. From time to time, the government and even the institutions themselves take initiative to get rid of drug addiction, but this does not happen. For this, the role of the individual himself and the family members is more important. Parents are often suggested to keep an eye on their children

and be alert when they see new friends to see if that friend is involved in drug addiction. Keep an eye on the actions of the people, even if their behavior seems a little different, if there are immediate tokens etc., then only we can save our youth and the future generation from going into this quagmire of drugs. Even today, many caste groups participate in social and religious functions. Drug abuse is seen as a tradition.

3. Health problem

Alcohol and drug abuse are most serious threats to the health and well being many young people today for a safe limit for Alcohol consumption. And especially when it concerns children and adolescents who are the most unalterable groups or while dealing with medicines it is related to the most due to which the condition of the country is very worrying, as a result of which incidents like fights ,reps happen every day in the society from various serious diseases and dying due to which his family has to face a lot of difficulty. Due to which the economic and social activities in the family which is the basis of any problem, the tendency of a person to take drugs, which is the strong desire to take drugs despite any basis among the various options, among the common grounds, the format of any option on the basis of all forms, among the same contracts. There is a tendency in the family to get addicted to drugs by looking at each other, so that the reaction that occurs after drinking it gets influenced by people and enables a strong desire to get addicted to it, due to which drug addiction leads to tiredness, restlessness and sleeplessness on returning home at night. One has to face mental illnesses which strengthen the desire to take drugs in the same format in any situation amid sky-high options on any facts, which is why new education is being done with the aim of making radical changes in the education system of the country. The policy has been implemented so that it can meet the contemporary needs of the country. People become disoriented while working. These reasons include anxiety, mental disturbance, failure, disappointment, stress, fatigue, neglect from family members, discord etc. may be mentioned.

4. Violence

Violence can be considered a direct result of alcohol and seen among youth is a big problem is very difficult to disclose, Drug and alcohol abuse on Young people who are victims of any families where one or both of the parents are abusing alcohol and drugs. We interpret the background of such family as violence. Intoxication is considered a curse in our society, which is the traditional practice of drinking alcohol among the people belonging to the lower category of tribe and caste structure. In these groups, drinking is an integral part of social life, on marriage, birth and many

other occasions. But they consume alcohol compulsorily. Even in the Hindu society, alcohol and intoxicants are widely used on occasions like Holi, Dussehra etc. Once they come under their influence, they start consuming them in the morning and evening and ultimately they become addicted to alcohol. In the modern society, the family environment is also a cause of intoxication, which has become a reason for fights between husband and wife by the important representatives. Being upset with the family environment, they resort to drinking alcohol. In many modern families in which the husband and wife go out. They go and work and it is difficult to keep an eye on their children after seeing their behavior. Similarly, when such families disintegrate, the possibility of misconduct and alcoholism increases among young men and women. It is necessary that people addicted to drugs should be identified in the initial stage itself. After diagnosis, efforts should be made to free them from drug addiction and the drug addicts themselves will have to come forward to save their lives and go to de-addiction centers for treatment so that the future of the people of the society can be saved from getting spoiled. So that the society can be made drug free.

5. Social Consequences

The social consequences of alcohol and drug abuse in society are rooted in those causes, The people who are using such substances in the first place are excessive alcohol and drug abuse by excluding factors such as curiosity, risk taking and imitation. You may feel uncomfortable in society. It can be difficult to deal with life's obstacles. And may lack some social interests or plans for the future. And a result can be seen through the formation of specific groups of friends who share similar habits. And make such a circle which is difficult to avoid Accordingly it can affect education. Where studies show that students who live outside the home more than the students. Society and family should also try to get rid of drug addiction by diagnosing the manifestations of drug addiction in its initial stages. This will provide adequate help in controlling drug addiction. Special attention should also be paid to the problem of rehabilitation of these people in the society after giving up the drug habit, so that voluntary organizations and institutions can play a significant role in this. In the North Eastern states of India.

Every percent grant is being given by the government to such institutions so that the people can get rid of these drug habits so that in a way it is becoming a fashion among the young men and women of cities, metros and universities, the victims of this are constantly trying to make new efforts to make their influence. Adopting new methods, the result of this is that the drug is spreading rapidly like a sweet poison, people are becoming slaves of this drug, once they get

addicted to the drug, it becomes very difficult to get rid of it. And along with people from big houses, children from middle and small families are also getting addicted to it. In many people, personal life gets distorted and distorted. Consumption of alcohol or other drugs is common for such people. For such people, alcohol is like an occupational necessity. That is, as long as its effect lasts. they feel fulfilled.

6. Objective of the Research

The purpose of this research is to save the youth from drug addiction and make them aware. According to the study, the way youth are losing their future in drug addiction the time has come to make the younger generation aware about it in time. And they should be made aware about the new officers of education and employment. Only then will the purpose of this study be fulfilled. When the society to gather save its young children from this drug curse, the society and this country should be saved. And free this country and society from this curse.

7. Literature Review

How this has become an essential topic due to the use of drugs and intoxicants among the people, and its impact on the youth of the society and the immoral impact their misuse is having on human health and society.

8. Darwinder Kaur V/s State of Punjab on 22 August 2012.

This Court in the matter of Vinod Kumar versus State of Punjab, CRM M-9327 of 2012, decided on 01.02.2012 held as under: "As the contraband seized is either a mixture or a preparation with or without a neutral material, of any Narcotic Drug or Psychotropic Substance falling within the scope of entry No.239 of the notification dated 19.10.2001 issued in S.O.No.1055(E) of the Central Government. It is absolutely necessary to conduct Pure Content Test to ascertain the exact quantity of the Narcotic Drug/Psychotropic Substance contained in the said mixture or preparation. In the absence of Pure Content Test, the whole contraband seized shall not be considered as such. However, in all the cases resigtered on or after 17.11.2009, there is no necessity to conduct pure content test to ascertain the exact quantity of Narcotic Drugs, Psychotropic Substances and Manufactured Drugs. The whole contraband seized shall be considered as such even if it comes within the definition of Entry No. 239.

In the case of a contraband, which is neither a mixture nor a preparation falling within the sweep of entry No.239 and if the contraband is a Narcotic Drug/Psychotropic Substance simplicitor, there is no need for Purity Test and in such cases, the entire quantity of Narcotic Drug/ Psychotropic Substance shall be taken into consideration for deciding as to whether the same is a small quantity or a commercial quantity or an intermediate quantity for the purpose of conviction and sentence will be imposed accordingly.

9. Verma Sunil V/S State of Haryana on 6 March ,2013.

The learned counsel for the appellant has further submitted that as per conviction slip the appellant has undergone incarceration for a period of two years, nine months and twenty nine days and two cases under the Narcotic Drugs and Psychotropic Substances Act, 1985 are stated to be pending against the appellant. It is submitted that appellant has been acquitted in both these cases and have placed on record the photostat copy of the judgments during the course of arguments. The appellant is also acquitted in other cases shown in the conviction slip. As per conviction slip, there are two cases registered against the accused under provisions of Narcotic Drugs and Psychotropic Substances Act, 1985 and in one case FIR No.256 dated 2.6.1997 regarding recovery of 280kgs of poppy husk he was acquitted on technical grounds that link evidence regarding sample was not produced along with the other circumstances. There is another case registered against the accused under provisions of Narcotic Drugs and Psychotropic Substances Act, 1985 regarding which no judgment has been placed on the file. It cannot be said that due to enmity three false cases have been registered against the appellant. Had the police any intention to falsely implicate the accused-appellant in the present case, in that case his name must have been figured in the ruka itself, which was sent for registration of the FIR. So the act of police naming the accused-appellant in the present case on the basis of recovery of contraband from him is the natural act of police. Section 54 of the Act envisages that if a person is found in possession of contraband, the onus shift upon him that how he was in possession of the said article. He was a non-Harijan and had stored the contraband in the chuff room of Verma Sunil 2013.10.22 11:55 Criminal Appeal No. 1204-SB of 2001 11 I attest to the accuracy and integrity of this document Punjab and Haryana High Court Chandigarh Harijan Chopal.

10. Sharanappa S/O chandrasha ... V/S State of Karnataka on 3 April, 2017

Consistent and corroborated. There are no good grounds so as to discard their evidence in toto. The meaning of cruelty under Sec. 498-A consist of two clauses. Firstly, it must be established that the cruelty or harassment to the wife was to force her to cause grave bodily injury to herself or to commit suicide or the harassment to compel her to fulfill illegal demand for dowry. Even the cruelty includes both mental or physical. Keeping in view the above said definition, on perusal of the evidence on record it indicates that the accused used to ill-treat and harass and also used to assault by consuming the alcohol and thereby he used to ill-treat both physically and mentally. That itself amounts to nothing but cruelty. Though the learned counsel for the appellant would contend that earlier also the accused used to consume alcohol and has assaulted her that has not driven her to commit suicide and as such it will not amount to harassment and cruelty. But, the consistent act of the accused by consuming the alcohol and abusing and assaulting would create mental pain and suffering and would make it not possible for her to live with the others. The said cruelty meted out by the accused was such in nature that the deceased was reasonably expected not to live with him. Only because of the advise made in the Panchayat she went along with the accused. The cruelty is such an element that it cannot be specifically stated whether the said act amounts to cruelty or not. But, it all depends upon how the person who has been treated with cruelty takes it has to be taken note of. Even the evidence also indicates that the deceased because of the cruelty was suffering with ill- health and fragile. No mother will take a drastic steps to put an end to her life and the life of the children without any just cause. When she is having husband like accused No.1 who used to consume alcohol and used to assault because of the said unbearable ill-treatment.

11. Mareeshwari V/S Pitchai on 28 September 2018.

In the case on hand, the respondent / husband was jobless after 2012, ie., hardly two years from marriage, and he continued to be under the influence of liquor despite his knowledge that his wife, viz., appellant, has remonstrated him. Drinking alcohol becomes injurious to the wife when the husband, enslaved by alcohol, ceases to be a partner in life. Thus the distress, pain, and suffering of the mind resulting from continuous drinking by the husband, that too, a jobless husband, transforms his individual <http://www.judis.nic.in> weakness into such injury to the mind of a wife whose susceptibilities, broken aspirations and other circumstances of her life, make

matrimonial life impossible. It is in such circumstances, drinking alcohol itself becomes matrimonial cruelty. Above all, from the materials available on record, it is seen that the respondent / husband, who remains to be unemployed even when he was healthy, filed maintenance case against the appellant/wife and then, he withdrew the same. Hence, it is to be held that by way of filing maintenance case against his wife, the respondent had tortured her. Having regard to the law laid down by the Hon'ble Apex Court and the growing concept of matrimonial cruelty, we are of the opinion that drinking alcohol by the unemployed husband and attacking the modesty of the appellant / wife in the matrimonial house to the extent evident in this case, constitute cruelty, by reason of the distress and injury caused by it, to the mind of the wife.

12. Conclusion

It can be seen through the mentioned results that alcohol and drug abuse among young people is indeed becoming a problem in the society however, these results are only small fragments of the results are only small fragments of the results of the biggest and using drugs .There by, the biggest concern in emphasizing the aspect of the younger generation is not that it is the foundation on which the future will be built in this entire history , governments and countries are trying to eradicate the mistake of the past by encouraging one generation up so that the condition of the youth of the country can be improved and their future and they can be saved from the serious consequences of drugs so that the condition of the country, society and can be improved. And in the present era of modernity, a large part of the class sees drugs as a fashion, it is considered a luxury and a fashion symbol, the tendency to drugs, which has found a lot of tendency to drug addiction in places like any village, city, township etc. From workers to politicians and from student to family, the trend of drug addiction has been observed, which has been considered the basis of comparison of drug experience in which parents do not have time to sit with their children and talk to their children. Children get into the company of bad habits like family drugs or alcohol. Such persons regularly drink alcohol in colleges, hotels and other such centers, he has become compulsorily of alcohol in the party organized by the person that is organized by the person. The use of alcohol in the party has become a necessity, which equals the options for any reaction, in your children, they do not get to know about the side effects and harms arising out of drug abuse in time, in the absence of which they themselves are considered neglected. Is. One gets addicted to these things, which gradually becomes an addiction and then it is the habit of going to clubs like this that helps in the addiction of alcohol, once the habit of drinking is very difficult to get rid of it goes.
