ABOUT WHITE BLACK LEGAL

White Black Legal – The Law Journal is an open-access, peer-reviewed, and refereed legal journal established to provide a scholarly platform for the examination and discussion of contemporary legal issues. The journal is dedicated to encouraging rigorous legal research, critical analysis, and informed academic discourse across diverse fields of law.

The journal invites contributions from law students, researchers, academicians, legal practitioners, and policy scholars. By facilitating engagement between emerging scholars and experienced legal professionals, *White Black Legal* seeks to bridge theoretical legal research with practical, institutional, and societal perspectives.

In a rapidly evolving social, economic, and technological environment, the journal endeavours to examine the changing role of law and its impact on governance, justice systems, and society. *White Black Legal* remains committed to academic integrity, ethical research practices, and the dissemination of accessible legal scholarship to a global readership.

AIM & SCOPE

The aim of *White Black Legal – The Law Journal* is to promote excellence in legal research and to provide a credible academic forum for the analysis, discussion, and advancement of contemporary legal issues. The journal encourages original, analytical, and well-researched contributions that add substantive value to legal scholarship.

The journal publishes scholarly works examining doctrinal, theoretical, empirical, and interdisciplinary perspectives of law. Submissions are welcomed from academicians, legal professionals, researchers, scholars, and students who demonstrate intellectual rigour, analytical clarity, and relevance to current legal and policy developments.

The scope of the journal includes, but is not limited to:

- Constitutional and Administrative Law
- Criminal Law and Criminal Justice
- Corporate, Commercial, and Business Laws
- Intellectual Property and Technology Law
- International Law and Human Rights
- Environmental and Sustainable Development Law
- Cyber Law, Artificial Intelligence, and Emerging Technologies
- Family Law, Labour Law, and Social Justice Studies

The journal accepts original research articles, case comments, legislative and policy analyses, book reviews, and interdisciplinary studies addressing legal issues at national and international levels. All submissions are subject to a rigorous double-blind peer-review process to ensure academic quality, originality, and relevance.

Through its publications, *White Black Legal – The Law Journal* seeks to foster critical legal thinking and contribute to the development of law as an instrument of justice, governance, and social progress, while expressly disclaiming responsibility for the application or misuse of published content.

“E-GOVERNANCE IN INDIA: CONCEPT, INITIATIVES, ISSUES, CHALLENGES, FUTURE PROSPECTIVES.

AUTHORED BY - DIPANKAR CHAKRABORTY

ABSTRACT

With the advancement in the area of ICT (Information, Communication and Technology) it has become the necessity of government to reform its services from manual to computers i.e enter into the paperless era. Even though ICT has created an environment where communication has become better and faster. But implementing these E- services is not a one day and one man task. Government has taken an initiative to provide the various government services to its citizens by the use of ICT. However, in developing countries like India there are many challenges in front of Government in implementing these services through internet, because the most part of the population is bellow poverty line and literacy rate towards IT services is also very less, it is a challenge for the implementing agency. Though India is a developing country, yet it requires to fill the socio-economic objectives with the effective governance of the government. Mostly all the nations in the world adopted ICT in their administration, providing essential goods and services to its masses on time. In the context of Indian economy, every sector is being impacted by e-governance, as a result of this, Government has launched the initiatives of e-governance, providing all services electronically as much as possible. When it dates back with regard to e-governance, it usually started from seventy decades on words. Since then, we have had different initiatives in terms of e-governance. Meanwhile, Government of India launched several projects in support of e-governance. In other words thses challenges seem to be hurdless to success of e-governance. Namely socio, economic, cultural, technical constraints, security concern, privacy etc. Though there are many challenges, issues, constraints, government has lot of faith on overcomming impediments and paving the way for success of e-governance. This paper describes about the concept, initiatives, issues, challenges, evolution and future prospect of e-governance in India.

Key words: E-Governance Evolution, E-Governance Projects, E-Governance Challenges, E-

INTRODUCTION

In my introductory part, I would like to state that, E-governance is becoming a buzzword. Across the world, we have been hearing about e-governance as socio-economic issues' expanding day to day, every government has started to extend its administration from high level to low level for mitigating of the various kinds of problems of socio-economic, science and technology, etc. with immense use of electronic devices (ICT). In fact, mostly in the world, both developed and developing economies extensively using all types of electronic devices to make government administration faster, transparent and accountable. In the context of India, being the one of the largest countries democratically, demographically and geographically; as stated, it still has gap of using govt. services to its large population. In addition to it, there are still problems related to socio-economic prevailing in the country like unemployment, poverty, education, health, banking and business, etc. As a result, govt. of India has been launching the various initiatives in order to overcome these problems with minimum govt. and maximum governance by enormous use of electronic devices. In support of it, every states, in the country, has launched different initiatives (projects of egovernance) in order to timely provide services to its huge population. In spite of this effective process, as said the issues above, retarding the success of e-governance to some extent. The present paper is going to discuss about evolution, initiatives, issues-challenges, and future prospects of e-governance in India.

STATEMENT OF PROBLEM

The existing literature describes about e-governance related to strategies, new technologies, implementation mechanism, issues and challenges and future prospects, etc. In fact, those literatures didn't focus on evolution, recent initiatives, etc. Therefore, this paper focuses on evolution and recent initiatives of e-governance.

OBJECTIVES

1. To study the evolution of e-governance in India
2. To focus on recent initiatives of e-governance
3. To analyze the issues and challenges of e-governance
4. To shed light on future prospects of e-governance

RESEARCH METHODOLOGY

The research method adopted for carrying out this work is primarily the doctrinal research method. Both primary and secondary sources have been used to collect materials for the study but mainly the data is collected for this study from secondary sources. The main aim of this paper is to discuss about e-governance in India with its objectives.

The journal, articles, various governmental and non governmental reports, news published in news paper etc. relating to “E-Governance In India” have helped me tremendously to make this work up to the mark.

CONCEPT OF E-GOVERNANCE

Governance refers to that structures and processes that are designed to ensure accountability, transparency, responsiveness, rule of law, stability, equity and inclusiveness, empowerment, and broad-based participation. Especially, e-governance is defined as “the application of ICT to transform the efficiency, effectiveness, transparency and accountability of exchange information and transaction between government, between government agencies, between government and citizens, between government and business. Through egovernance, government services will be made available to citizens in a convenient, efficient and transparent.

RECENT INITIATIVES OF E-GOVERNANCE IN INDIA

Govt. of India has had many initiatives, since 1970 onwards. Initiatives imply that a new process, every initiatives launched by government for the sake of e-governance. As population grown up, it had to deal with providing essential services and goods to masses. As a result, every successive government launched initiatives for good democratic governance. If we go back to 70th decade about e-governance, there was the first initiative; it was NIC, 1977, thereafter, there were other initiatives like NICNET, 1987, IT ministry in 1999, e-gove. Plan in 2006; e-kranthi and latest one digital India. Following, each of these initiatives can be summarized.

Table-1: E-Governance

Sl No	Initiatives	Services
1	G2C model	This model of e-governance is to share info between government and citizens. - Payment of online bills such as electricity, water, telephone bills. - Online registration of applications - Copies of land records - Online filing of complaints - Availability of any kind of information
2	G2G model	This is model of –governance is to share info between the intra governments - Sharing of info between police dept of various states - Government document exchange(preparation, approval, distribution, and storage) - Most of the finance and budget work done by e-governance
3	G2B model	This model helps to share info between government and private sector - Collection of taxes - Rejection and approval of patent of companies - Payment of all kind of bills and penalty - Sharing of all kind of info, rules and data
4	G2E model	This model links the information between government and employees -Employees can register all kind of working forms through online -All kind of data submission(employee record& attendance)from various govt. offices -All kind of rule-regulation and information for employees can be shared by this -Employee can file all kinds of complaints and dissatisfaction by this model.

As can be observed from the above table, among these major initiatives, there are key projects launched; all of these projects led to initiatives for the good e-governance. These projects launched by both center and state governments as mission mode projects. Those tabled below as they launched in turn.

Table -2: State wise projects of e-governance.

Sl No	State / Union Territories	E-Projects
1	Andhra Pradesh	E-Seva, Card, VOICE, MPHS, FAST, E-Cops, Saukaryam
2	Bihar	E-Khajane, Sales Tax Administration Management Information
3	Chhattisgarh	Chhattisgarh Info Tech Promotion Society, Treasury Office, e-linking project
4	Delhi	Automatic Vehicle Tracking System, Electronic Clearance System, Delhi Slum Computer Kiosks
5	Goa	Dharani Project
6	Gujarat	Dairy Information System Kiosk(DISK), Form Book Online, Census Online, Tender Notice
7	Haryana	Nai Disha, Result through Binocular
8	Himachal Pradesh	Lok- Mitra, e-pension, Unreserved Ticketing System by Indian Railways
9	Jharkhand	Vahan, Tender Notice
10	Karnataka	Bhoomi, Kaveri, Khazane
11	Karnataka	RD Net, Fast, Reliable, Instant, Efficient Network for the Disbursement of Services (FRIENDS)
12	Madhya Pradesh	Gyandoot, Gram Sampark, Smart Card in Transportation Department, Headstart.
13	Maharashtra	SETU, Koshvani, Telemedicine Project, Online Complaint Management System Mumbai
14	Orissa	E-Shishu, Common Service Centers (CSCS) in Panchayats
15	Punjab	SUWIDHA (Single User Window Disposal Help Line for Applicants), SUBS (Suwidha Backend Services),

		SSIS (Social Security Information System) WEBPASS (District Passport Application Collection Centre)
16	Rajasthan	Jan Mitra, Lokmitra, RajNidhi, Aarakshi-Online FIR, Professional e-Delivery of Tax Payers by Income Tax
17	Tamil Nadu	Application Forms Related to Public Utility, Tender Notice & Display
18	Uttar Pradesh	Lokvani, e-Suvidha, Bhulekh, Treasury Computerization, PRERNA: Property Evaluation and Registration Application
19	Uttarakhand	Kisan Soochna Kutirs (KSKs), Village Information Centre (VICS), Computerization of Land Record Department
20	West Bengal	Vehicle Registration, Land Records, Birth and Death Registration, Computerization of Health Records, Payment of Excise Duty, Sales Tax and Local Tax, Electronic Bill Payment of Water and Electricity
21	North eastern state	
22	Assam	ASHA

ISSUES OF E-GOVERNANCE

Technical Issues

1. **Interoperability:** It is one of the critical issues of e-governance. Interoperation among ministries and departments is difficult, and it became hurdle for processing and sharing data. In other words, web based data how to be captured and in which format these seem to be major issues of e-governance.
2. **Security:** Now days, security of online transaction is becoming big issue; insurance, banking, utility bill payments, all these services done by e-governance. In fact, there is still discontent to citizens on availing government services due to lack of security.
3. **Privacy:** This is another key issues of e-governance.any information provided by citizens should be ensured by govt. otherwise, any person or institution may misuse the valuable information.

4. Authentication: It is very important to know the right user of the services or it may be misused by private competitors. Meanwhile, the digital signature plays major role in providing authenticity. In fact, it is expensive and causes for frequent maintenance.
Economic issues
5. Cost: It is one of the economic issues, implementation of e-governance operations and maintenance of services fetch huge cost to govt.
6. Reusability: Any models developed by government, must be reusability. E-governance is being national plan, what it incorporates any software or modules should be used by other administrations.
7. Maintainability: Maintenance should be given due importance. Because, IT ministry has been continuously developing new soft ware's in order to fill the current needs of citizens. Consequently, govt. launched new projects for example, digital India.
8. Portability: The primary requisite for portable applications is independence of components from hardware and software platforms in order to help in possible reuse by administrations.
9. Social issues

Social Issues

1. Accessibility: In the era of technology, mostly number of people using internet via computers and mobile phones. In the context of India, there is still gap arising between users and nonusers; it is because of language barrier, inadequate infrastructure in rural areas, etc.
2. Usability: Users of e-governance may be literate or illiterate. Any technology or software to be used as user friendly to greater extent, only then, citizens could use it as smoothly as possible.
3. Use of local languages: India's population is second next to china, over 65 % only literate citizens are there; rest of population cannot understand the English language. Therefore, govt. should make it more comfort by translating this language into their regional languages for the sake of benefit of e-services.
4. Awareness about e-governance: Number of people in the country has not been aware of it, on account of illiteracy, non-accessibility of internet in rural areas, lack of will using internet services, etc. Therefore, educated citizens, concerned institution and dept. should come forward to get rural people benefited by e services.

1. **Trust:** It is the emerging challenges of e-governance. Trust can be defined regarding users of new software and trust of the govt. former aspect implies that users of any type of software or technology must be confident, comfortable and trusting of it. Another very important aspect related to trust of govt. Nowadays, citizens using e-governance services, trusting the innovations of e-governance to some extent. Furthermore, there might be some fraudulent activities done by any other entity for the sake of finance, valuable info and even about personal information, etc. Besides, in govt. offices, dept. valuable info sometimes left out or missed; it definitely erodes trust about e-governance among all classes citizens of the economy
2. **Digital divide:** Even in the era of science and technology, there is still huge gap exists between users and nonusers of e-govt. services. In fact, in India, majority of the masses, who living below poverty line and they deprived of govt. services. In contrast, some portion of people are immensely using the e-services of government. However, this gap needs to be made narrow, then only, the benefits of e-governance would be utilized equally.
3. **Cost:** One of the difficult tasks of the govt. is to spend on implementation of e-governance initiatives to which govt. has to bear huge cost. Few other developed countries UK and Singapore spending 1% of GDP and 0.8% of GDP respectively. India spending only 3% of GDP, indeed, govt. should motivate the officials, administrators and common people using services of e-governance subject to conscious use of public finance on these types of projects.
4. **Privacy and Security:** It is one of the critical challenges of e-governance. Financial services, medical services and personal information are to be protected with security, and then only, there will be number of people trusting of it. Therefore, implementation of e-governance projects must have security standard and protocols for safeguarding the interest of all classes of masses; otherwise, citizens will lose trust and confidentiality of e-governance.
5. **Infrastructure:** It is essentially required for implementation of e-governance as much as possible in India. Electricity, internet and poor adaptability of technology will retard the progress of e-governance. In the context of developing countries, there should be enough basic facilities in order to give impetus to egovernance E-G.

FUTURE PROSPECTS OF E-GOVERNANCE

1. To deliver all kind of govt. services through electronic mode. It will make government transparent, efficient and easily accessible to citizens to get benefitted of various services by way of e-governance.
2. In order to reach out the citizens from remote control areas, mobile governance to be given priority, through which, both transactional and informational govt. services provided and providing innovation in mobile governance.
3. Govt. to try so as to infuse advanced technology for executing the ongoing projects to greater extent. It would keep the sustainability of multiple projects.
4. To create an eco-system that promotes innovation in ICT for govt. and for applications that can benefit the citizens.
5. To promote ethical use of e-governance services. In which, keeping the information of govt., private institutions safer and securing e-govt. cyber world.

CONCLUSION

In my conclusion part, I would like to state that, E-governance is getting momentous in India. E-governance has had great role in each sphere of the economy over number of years. India economy has been progressive one on account of good governance. Conventionally, govt. used to struggle to provide services to its citizens before initiatives of e-governance. When government started launching many initiatives for e-governance; it has become one of the emerging economies due to its potentiality of ICT. Till now, govt. has implemented various initiatives with different projects (Digital India, e-kranthi, etc). However, it still has some hurdles regarding e-governance, such as: digital divide between urban and rural, poverty, illiteracy, security and cost of implementation, etc. Each of these issues and challenges are posing serious concern to government. Mean while, previous and current govt. launched multiple initiatives byover coming the above issues and challenges. Under twelve five year plan, some of the future prospects outlined and partly achieved by every government. However, govt. should spend more on this initiative to make it transparent, convenient, safer and citizen friendly in order to enhance people confidence in to good democratic governance.
